

## **Cardiovascular Technologist**

We are expanding! Come join our team.

One Heart Care is a leading state of-the-art cardiology clinic and one of the largest in Canada. We offer a wide range of cardiac diagnostic testing and comprehensive consultations - we are a place where patients can be seen by the right specialists, at the right time, with the right testing, all available under one roof.

If you're ready to be part of a team that is revolutionizing the future of healthcare, then you will want to join our state-of-the-art clinic, where the possibilities for innovation, new discovery and system thinking are limitless. At One Heart Care we value leadership, diversity, collaboration, relationships, equity, and safety, and are guided by these values in everything we do. This has enhanced our ability to attract the best talent and provide exceptional patient experience.

We are growing and with 100+ team members we are seeking exceptional registered Cardiovascular Technologists for full time and part time positions to provide outstanding cardiac care and diagnostics for our community and beyond.

*\*\*Attention new graduates. Please feel free to reach out to us while waiting for your CSCT exam results.\*\**

### **Responsibilities:**

- Accurately perform and analyze regular Stress Tests, Stress Echos, Ambulatory Blood Pressure Monitors, Holter Monitors, Scanning and ECGs
- Produce comprehensive reports and prepare results for the Cardiologist
- Ensure the accuracy and reliability of test results by following established protocols, documenting results and reporting any abnormalities
- Communicate abnormal test results to the cardiologist/doctor in a clear and concise manner
- Maintain equipment and supplies in cardiovascular testing and procedures, including calibration, cleaning, and troubleshooting

### **Qualifications:**

- Cardiovascular Technologist Diploma
- Canadian Society of Cardiology Technologists (CSCT) membership in good standing
- Minimum 1-3 years of experience
- Valid CPR certificate
- Must be proficient in ECG interpretation
- Ability to use EMR proficiently
- Ability to follow emergency protocols
- Strong technical skills, including the ability to operate and maintain cardiovascular equipment
- Excellent communication skills when interacting with patients and physicians
- Knowledge of patient confidentiality guidelines

- Strong problem-solving skills and ability to troubleshoot issues with equipment or procedures
- Ability to work effectively as part of the CVT team
- Strong attention to detail and commitment to accuracy

### **How to Apply:**
