

CSCT President Report October 2018

I would like to start by saying what an honor it is to represent the Canadian Society of Cardiology Technologists as the current President. I have a skilled team working with me that includes the Board of Directors, the Executive and various committee members. Without this group of volunteers, CSCT would not be as successful as we know it today.

Cardiology Technology is a profession that we can all be very proud of. The strength of CSCT is a result of the members who help to maintain high standards of practice and provide quality patient care. Together, we continue to raise awareness of our profession in Canada by celebrating National Cardiology Technologist's Day each February. I encourage all members to get involved with their provincial associations so that our profession can continue to grow.

It has been a busy year for the CSCT Board of Directors and committees as we have initiated revisions to the Continuing Education Units (CEU). We continue to make updates to both the Board of Directors and the membership guidelines and policies. All documents including our Bylaws can be found on the CSCT website. The website is continually updated with new information.

We have seen great results from Yardstick, the new CSCT exam delivery company. As membership continues to increase with the success of our exam candidates, CSCT would like to acknowledge the college programs for their expert teaching and preparation of the exam candidates.

In 2020, the Canadian Cardiovascular Society (CCS) will begin a new rotation of the Canadian Cardiovascular Congress (CCC), hosting in various cities throughout Canada. We hope this will encourage more CSCT members to attend this great educational and networking opportunity.

CSCT will be celebrating their 50th Anniversary in Edmonton in 2020. We have a committee who has been busy planning to make this milestone a great celebration. I hope to see you all there.

Respectfully submitted,
