

Saskatchewan Provincial Director's Report

October 2019

The SCTA held their 2019 AGM and Education Day in May. As it was an election year for us, we have welcomed some new members to our board. Our newly appointed President was the Education Director and I vacated the CEU coordinator seat to take on the Provincial Director. The previous interim secretary has taken on the role of CEU coordinator. We are excited to have 2 new members taking on the Education Director and Secretary positions.

This year we supported our members for Cardiology Technology Day. Different centers throughout the province were given funds to use to promote our profession. To name a few things, members did raffle baskets, made heart shaped baking and set up displays in their respective hospitals for other staff and visitors to see what an important role a Cardiology Technologist plays in their health care.

We also sent out a survey to our members this year to get some feedback. Items included our education session, the AGM and our website. It was a great tool for the executive to hear what our members are wanting to see and do going forward.

The SCTA has also decided this year to go paperless with our membership cards.

Respectfully submitted,

April Forrest
Saskatchewan Director

SCTA Executive

President-Oksana Czaikowski
Vice President-Nicole Schriemer
Director-April Forrest
Treasurer-Patricia Budnick
Registrar-Carla Regush
PEC-Jane Reiben
